

Chainsaw Intermediate

The intermediate chainsaw course offered by TABMA Training provides participants with practical knowledge of the procedures for felling sound trees that require significant tree assessment. The course allows participants to develop their basic chainsaw competency to an intermediate level. The expert trainers seek to teach participants of felling trees with some difficulty where variations in tree characteristics apply.

TABMA Training Trainers are Leading Industry Experts with extensive experience in the Industry!

What you will learn...

- * Correct use of multiple wedges
- * Regulations and safe work practices
- * Environmental protection measures
- * Assessing trees falling characteristics and planning fall
- * Identifying structural defects in trees
- * Preparing and maintaining falling equipment
- * Identify, assess and manage hazards
- * Practical application and skills development

"Out of everything that TABMA Training does it's their commitment to quality outcomes for trainees that has impressed me. I am extremely grateful for their dedication in this area."
