

Forklift

TABMA Training offers one of the best value forklift training courses available. Aimed at both beginners and experienced operators, participants will learn both theory and practical aspects of operating a forklift safely and effectively leading to a licensed outcome.

TABMA Training Trainers are Leading Industry Experts with extensive experience in the Industry!

What you will learn...

- * Monitor and maintain forklift conditions
- * Operate a forklift to handle various loads
- * Forklift data plate, checklists and pre checks
- * Danger points and positioning when steering
- * Shifting loads
- * Monitoring site conditions
- * Effective operation, shut down and securing of a forklift
- * Forklift stability
- * Basic position of machine

Forklift

"Another positive from the training is that our people are more aware of how their job impacts on others in the business. This has led to people discovering even better ways of working together. The TABMA Training trainers have relevant industry experience and can add real value to our participants."

Neil Jones, Versace Timber

Call 1300 693 483
