

# CHAINSAW BASICS COURSE

*A chainsaw can be a very dangerous piece of machinery when used casually or without proper training. Our experienced trainers will minimize the potential dangers by educating all participants on the correct use handheld chainsaws.*

# TABMA TRAINING TRAINERS ARE LEADING INDUSTRY EXPERTS WITH EXTENSIVE EXPERIENCE IN THE INDUSTRY!

The course involves cutting a range of materials with a handheld chainsaw in a variety of domestic and workplace settings including construction sites, sawmills, frame and truss factories and timber retail yards. Ensure your staff are trained effectively when using chainsaws.

## What you will learn:

- Maintenance and servicing requirements of chainsaw power heads and cutting attachments.
- Correct techniques when chain sharpening, including dismantlement and assembling.
- Identifying parts of a chainsaw properly.
- Storing unused chainsaw's in a safe and proper manner.
- How to operate a chainsaw safely with the correct safety equipment.
- How to safely cut various materials commonly used in the industry.
- Identify problems, malfunctions and defects with equipment.

## FULL DAY COURSE ONLY \$350

*The Chainsaw Basics Course can be tailored to suit your individual business and employees.*

*A nationally recognised statement of attainment of units of competency in a FWPCOT2237 Maintain Chainsaws and FWPCOT2238A Cut Materials with a Handheld Chainsaw will be issued upon successful completion of assessment.*
